## **CNMC Produced Another Record Single Gold Pour of 2,314.42 Ounces of Gold Doré Bars<sup>1</sup>**

---

*All capitalised terms used in this announcement shall, unless otherwise defined herein, have the meaning ascribed to them in the Company's announcement dated 18 November 2013 in relation to the successful commissioning of CNMC's second gold de-absorption plant ("Announcement").*

The board of directors (the "Board") of CNMC Goldmine Holdings Limited ("CNMC" or the "Company") refers to the Announcement and is delighted to report that the Company's Sokor Gold Project has produced another record for a single gold pour of 2,314.42 ounces of gold doré bars.

This represents the highest production output on record for a single gold pour since the start of the Company's gold production in July 2010. As compared to the previous record of 2,130.74 ounces as reported in the Announcement, this reflects an increase of approximately 8.6%.

The production output signifies a positive achievement for the Company given that February has only 28 days and the operating days for the production activities in February is further shortened by the Lunar New Year holidays.

---

<sup>1</sup> A crude gold, silver bullion, usually produced at the mine site which is then sent to a refiner where the silver and gold are parted and the gold is refined to commercial-grade gold bullion
